

October 6, 2020

Dear Fellow Republican,

Have you heard the news? The United States Supreme Court ruled in our favor—they ruled to protect election integrity, despite the Democrats' radical efforts.

VOLUNTEER

Here's what happened:

- South Carolina law, since the 1950s, required a witness signature on absentee ballots
- Just months before a presidential election, Democrats filed a lawsuit hijacking the COVID-19 pandemic and attempting to change our election laws in the middle of the game
- The South Carolina legislature expanded absentee voting, allowing any voter in the state to vote absentee, but still requiring a witness signature for ballot security
- A Democrat appointed judge overstepped her authority and intervened, waiving the witness requirement
- We appealed to the United States Fourth Circuit
- They ruled in our favor, and less than 24 hours later, they changed their mind
- We appealed to the Supreme Court
- The highest court in the land ruled in our favor, granting a stay to the Fourth Circuit ruling, reinstating the witness signature requirement

Long story short: Democrats have been attempting to hijack the COVID-19 pandemic and use it to meddle in our elections, causing widespread voter confusion in the process.

But despite their radical efforts, they lost.

Ballot security goes both ways: Voters need to know their ballot is secure, and that everyone else's ballot is also secure. And thanks to the Supreme Court's motion, it's a great day for people who care about ballot security and the integrity of our elections.

Can you help share this good news with your friends and celebrate a win for election integrity? While you're forwarding this email to your friends, make sure to sign up and volunteer with our Victory program.

We are less than one month away from Election Day, and we need your help now more than ever.
